

## **DMK54L3S-8**

1998-2002 Dodge 2500-3500 5.9L I6 Diesel Cummins W-WO/AC Requires 8 Groove Pulley

## **INSTALLATION NOTES**

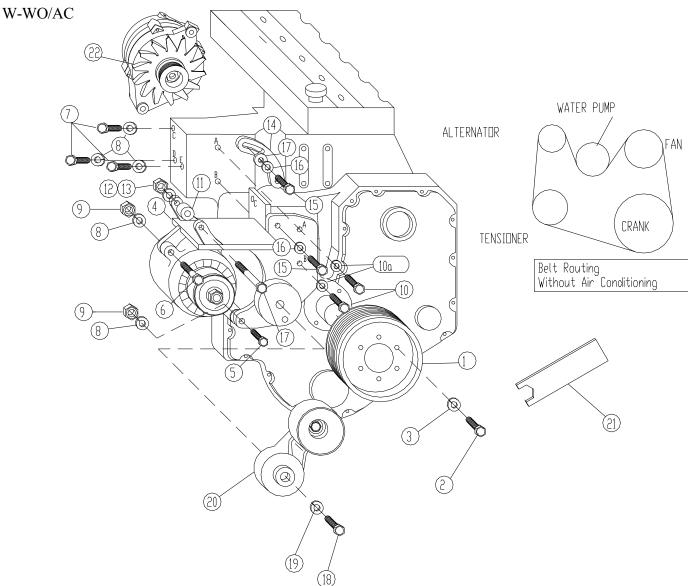

- 1. Disconnect the negative battery cables from both batteries. Remove fan clutch assembly using 1 7/16 wrench (21) provided, threads are left hand.
  - **NOTE:** Fan shroud does not need to be removed, take care not to damage radiator with fan.
- 2. Remove serpentine belt and fan pulley. Install drive pulley (1) with bolts and lockwashers (2 & 3).
- 3. Remove alternator from mounting bracket and lay aside. Remove upper alternator bracket and engine lifting lug. Remove bolt holding wire loom that crosses front of engine.
- 4. Install pump bracket (4) with bolts (7 & 10), leave bolts loose. Install alternator to bracket (4) with bolts (5 & 6). Tighten all bolts.
- 5. Install clutch pump (16) with bolts provided. Align clutch pulley to drive pulley (1) tighten pump bolts.
- 6. Install belt tensioner (13) on to the main bracket, using bolt (11) and lock washer (12).
- 7. Install O.E.M. serpentine belt, (trucks not equipped with A/C must have a new belt installed; Dayco #5080600 or equivalent-*not included in kit*). Install pump drive belt.
- 8. Re-route engine wire loom away from any moving parts and secure. Connect battery cables.

**CAUTION:** Check all engine compartment vacuum hoses and electrical wiring that may have been disturbed or re-routed during kit installation to be sure that hoses are not kinked, that they do not touch any high temperature item, and that they do not interfere with any linkage components.
