

INSTALLATION NOTES

1. The buyer is responsible for providing trained and experienced installation decision making with technical know-how to apply professional judgment that specifically applies to each individual installation.
2. Be sure to read and understand all available information including but not limited to instructions, warnings, sales terms, and warranties for the vehicle and all system components prior to attempting installation.
3. Disconnect negative battery cables. Remove the cable ties securing the air line going to the air clutch from the wire harnesses running in front of the head. Re-route the air line to the front side of wire harnesses in front of the head by removing and re-installing at the fitting on the firewall. This is to allow wiring to set back closer to engine for better clearance. Re-secure wire harnesses using cable ties (17).
4. Remove the serpentine belt. Remove the factory idler pulley and spacer located at location [A] above the water pump. This will be re-used. Remove the four bolts and hose standoff from the radiator support on the driver side of engine.
5. Install mounting plate (1) using bolts (2,2a) and factory hose standoff on top of radiator support bracket. Re-connect overflow hose to standoff using zip tie (18). Additional retainers for overflow hose may need cut to prevent kinks. Do not tighten bolts. Install idler mount (4) using bolts (5) with flat washers (7) and lock washers (6). Then, bolt (13), idler (11), and bushing (12) at location [A]. Once all bolts are finger tight, first torque bolt (13), then torque mounting plate bolts (2). Once this is done, tighten the other idler bracket bolts (5). Install OEM idler (8) to idler bracket (4) using bolt (10) and spacer (9).
6. Install the auxiliary alternator using bolts (14) and slide bushings (15). Install belt (16) according to the belt diagram below. Check all clearances to prevent damage to wiring, air lines, etc. Reconnect battery cables.

CAUTION: Before starting the engine. Check to make certain no wires, hoses, etc. that may have been disturbed during installation do not come in contact with any hot or moving parts. Run the engine and check for proper belt tracking, adjust if necessary.

Disclaimer: (1.) Due to the custom nature and variation of all add-on systems of this type, no complete system kits are offered by the manufacturer, and any group of parts marketed as a kit is limited to only the individually defined parts in that specific kit. The system designer's rotating accessory components are not included, offered, or fully known by the manufacturer. In addition to the absence of the rotating accessory system, other potential components such as additional clamps, brackets, wear liners, hardware, or other items that may be required by the system designer must be identified and supplied by the actual system designer. (2.) Due to vehicle manufacturer's assembly tolerances, production changes, and installation variances, it is the buyer's responsibility to ensure adequate clearance for all components including space for and safe location of the fan, radiator, all lines, and wires. Check for possible movement, vibration, friction points, heat exposure and/or shifting of any and all components such as hoses, wires, and all other components including those that may otherwise be considered non-moving and/or unaffected by the installation (3.) The buyer is responsible for the entire installation of a mounting kit as the mounting kit is part of a custom process controlled by the buyer through their whole system design and directed installer as the installer evaluates, locates, routes, aligns, and tightens all components while determining if additional clamps, brackets, wear-liners, or other components may be required, beyond those included in the kit. Any additional items required, beyond those included in the kit, are to be provided at the expense of the buyer. (4.) The buyer is responsible for the development and communication of their whole system installation procedures, safety precautions, application, and use of the engine accessory mounting kit in their system, including efforts to maintain vehicle control and prevent pinch, wear, impact, and/or burn exposure on all hoses, wires, and other parts. (5.) The buyer is responsible for providing trained and experienced installation decision making with technical know-how to apply professional judgment that specifically applies to each individual installation. The buyers chosen installers must be qualified and experienced technicians that are familiar with the vehicle and accessory being mounted as well as the buyer's whole system design and installation procedures associated with the kit. (6.) The buyer is responsible for determining and achieving compliance to all regulatory issues that apply to the use of all products. (7.) The manufacturer reserves the right to make changes and/or improvements to any product at any time with or without notice.

PARTS LIST							
Item	Part Number	Description	Qty.	Item	Part Number	Description	Qty.
Main Bracket				Smooth Idler Pulley Assembly (Group 2)			
1	FLMP8092V-I8	Main Bracket	1	11	IPCD3.0	Machined Idler Pulley	1
Main Bracket Mounting Hardware				12	CMB741	Machined Idler Bushing	1
2	1018229	M10-1.5 x 60mm 10.9Gr Hex Flg. Bolt	3	13	1016343	M10-1.5 x 70mm 10.9Gr Hex Flg. Bolt	1
2a	1018225	M10-1.5 x 55mm 10.9Gr Hex Flg. Bolt	1	Auxiliary Alternator Mounting Hardware			
3	N/A	Omitted		14	1005539	M10-1.5 x 110mm 10.9Gr Hex Bolt	2
Idler Assemblies Mount Plate				15	1011888A	M14 Slide Bushing	2
4	FLMB801	Idler Assemblies Mount Plate	1	Belt			
Idler Assemblies Mount Plate Mounting Hardware				16	5081178	Dayco 8-Groove 117.8" Belt	1
5	1004000	M10-1.5 x 25mm 10.9Gr Hex Bolt	2	Zip Ties (Not Shown)			
6	1003822	M10 Lock Washer	2	17	1005413	7" Zip Tie	6
7	1003748	M10 Flat Washer	2	18	1005417	15" Zip Tie	1
Smooth Idler Pulley Assembly (Group 1)							
8	N/A	OEM Smooth Idler Pulley	1				
9	CMB741	Machined Idler Bushing	1				
10	1006934	M10-1.5 x 50mm 10.9Gr Hex Flg. Bolt	1
